ANIMALS

COMEDY
TIME!

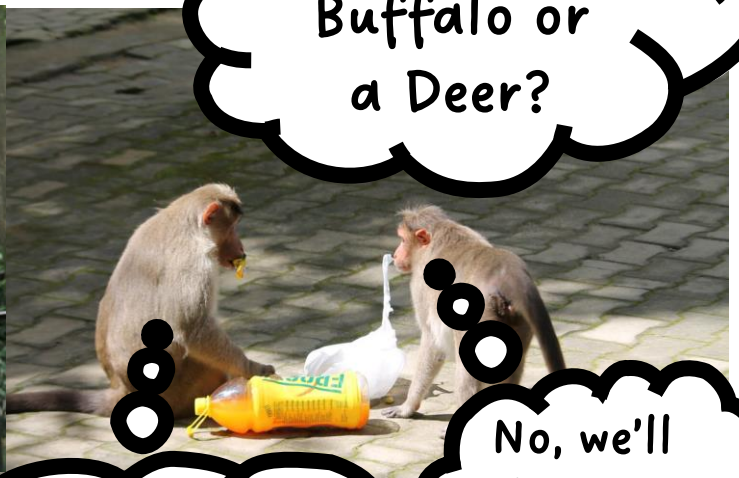

Hey, let me
sleep will
you?

Was that a
Buffalo or
a Deer?

It is a great
view up here!

Should I say sorry
to the guy who I
stole these from?

No, we'll
have a
party!!!

I'm Spider-Man
but I'm not a man.

JACKALS IN THE WILD

2

Jackals are of the dog family. Most of them are Omnivores (Animals who eat meat and grass).

It lives in the ruins of places which are abandoned by humans.

Jackals are called as the Wild Dog. Jackals are very clever. They are often found in Panchatantra stories.

Owls have fixed eyeballs which is the reason why they have to turn their head around.

Snakes do not dance by hearing the music which is played by the been (An instrument used to make snakes dance). It dances by following the movement of the been.

Sloths live for about 40 years and in that time they move around only 8 trees. Once a week it comes down to relieve itself.

A tiger's sense of hearing is very sharp that it can make out the difference between the rustling of leaves and the sound of an animal moving on the grass.

A Eagle can see a small ant moving on the ground from above the clouds.

A dog can understand if there is another dog in the area by their smell and urine.
